

# Jeff MARTIN

---

OBJECTIVE: I enjoy positions that allow me to use several of my skills. I find that my background as both a network engineer and as a software developer allows me to be more productive. I prefer positions that allow me to work with free and open technologies. I'm constantly learning and I like staying current with the latest tools.

---

## WORK EXPERIENCE

2009	Demonic Binary - Security/iPhone Developer
to PRESENT	Currently working on a encrypted chat program using NFC and Bluetooth Low energy to be released in 2020. Utilizing firebase and batch for the notifications. I developed numerous in-house iOS apps using Objective-C and Swift with Parse as the mobile backend for three small businesses that utilized iBeacon so employees were able to get news fed to their devices. Tested and audited for quality code.
